

NEMESIS

UMT-2Di - Multi-Button & MIDI > USB Converter with integrated controls

The Nemesis UMT-2Di is a perfect standalone solution for the complex external control requirements of theatrical control and playback software, including QLAB™, CSC, SFX™, SCS, Sony Vegas™ and similar packages.

Manufactured in a rugged hard-wearing box, the UMT-2Di features two large integrated buttons and a high quality rotary encoder for easy access to standard Go, Stop, Previous and Next commands, for a complete “all in one” solution. It connects to the host computer via USB MIDI data. In addition, the UMT-2Di provides connectors for optional external GPI signals, such as additional remote operator GO and STOP button pushes or MD triggers. By centralising all external inputs and converting them to standard MIDI commands, interfacing to a single piece of software can simplify all programming and playback requirements.

Key features:

- > 2 integrated fully programmable control buttons
- > Integrated high quality fully programmable stepped rotary encoder
- > 2 x 3-Pin XLR over-voltage protected inputs for external push button triggering, e.g. MD Start/Stop
- > 9-Pin D-SUB connection to facilitate button panels or trigger boxes, e.g. Nemesis REM89
- > Class-compliant integrated USB MIDI Interface
- > PC and Mac compatible
- > External MIDI interface via breakout providing physical MIDI IN/MIDI OUT
- > Activity LEDs for button status and enumeration information
- > Bus Powered

The **Nemesis** range of show control hardware was created to address a specific gap in the market for powerful, reliable and flexible show control and audio playback solutions. Designed specifically for the challenging theatre and live entertainment environments, and manufactured to the highest British engineering standards, the **Nemesis** design objective is to provide a fully specified and highly resilient set of control and redundancy hardware, enabling engineers to achieve seamlessly integrated performances.

With **Nemesis** behind the scenes, the show will go on – without unwanted interruptions and with ultimate control.
