

NEMESIS

DMXVF - Video Fader

The Nemesis DMXVF is a Dual Channel DMX Controlled Video Fader, with a powerful built-in video distribution amplifier, designed to put an end to any unwanted light from your visual monitors or screens.

Key features:

- > 2 x Independent video channels
- > In-built 4-output Video Distribution Amplifier per channel
- > Fades input signal to black while retaining sync signal
- > DMX control operation with thru
- > Built-in testing features when DMX is unavailable
- > Composite video
- > Each channel controlled by the same or separate DMX Address
- > Front Panel LCD display showing current DMX status and user configurable options
- > DMX control operation configurable to allow unit to work as a video mixer/fader (max DMX = max video) or video blackout (max DMX = video blackout)
- > 1U Rack Mount unit with 75Ohm Video BNC In/Out, 5-pin XLR DMX Connection with Link-thru

The **Nemesis** range of show control hardware was created to address a specific gap in the market for powerful, reliable and flexible show control and audio playback solutions. Designed specifically for the challenging theatre and live entertainment environments, and manufactured to the highest British engineering standards, the **Nemesis** design objective is to provide a fully specified and highly resilient set of control and redundancy hardware, enabling engineers to achieve seamlessly integrated performances.

With **Nemesis** behind the scenes, the show will go on – without unwanted interruptions and with ultimate control.
